

## Monitor the Impact

### Sample Outcome Rubric

The outcome Rubric is used to assess each piece of technology on the scales listed below. By using a consistent rubric across every technology study that we conduct, we have a way to make comparisons between the products that we use. Each content area is rated on a Likert Scale.

#### **Proficiency**

Proficiency refers to the ability to do, to function.

#### **Frequency of use of technology**

Frequency of use refers to utilization of technology within environment habitually throughout the day.

#### **Connectivity/Reliability/Dependability**

Refers to the ability of the technology to function as expected, including issues experienced with connection speed or signal and issues with the technology itself.

#### **Portability/Community Integration/Mobility**

Refers to the individual's ability to access the community while utilizing the technology

#### **How well did this meet its purpose?**

#### **User interface**

User interface refers to the simplicity of use for the user.

#### **Goal Achievement**

How well does the technology assist the user in achieving their goals?
