

Visitation Screening as of 1/11/2021

FOR THE PERSON SERVED

LOWER RISK	MEDIUM RISK	HIGH RISK
<p>Under age 34 NO significant health issues, especially: Immunocompromising condition/treatment/medications Obesity Smoking Diabetes Heart condition(s) Lung disease/asthma Kidney disease Liver disease</p> <p>Able to comply with mask use, social distancing, handwashing Independent and not reliant on hands-on care</p> <p>Lives independently, no housemates or 1-2 housemates, own room, own bathroom</p>	<p>Age 34-64 One of these health issues:</p> <ul style="list-style-type: none"> Immunocompromising condition/treatment/medications Obesity Smoking Diabetes Heart condition(s) Lung disease/asthma Kidney disease Liver disease <ul style="list-style-type: none"> Not consistently able to comply Somewhat dependent on others for care Has 2 or more housemates Housemates are high-risk 	<p>Age 64+ One or more of these health issues: Immunocompromising condition/treatment/medications Obesity Smoking Diabetes Heart condition(s) Lung disease/asthma Kidney disease Liver disease</p> <p>Unable to comply Dependent on others for care Group home setting, shared bedroom, shared bathroom</p>

ALSO, Mom and Dad/Family Members: Screen yourselves for the above!! Are YOU at RISK?? (We care about you, too!)

FOR THE PLANS

****BEST****

Individuals stay at their program and family does outside visit or drive by outside-the program celebrates together until restrictions are lifted

LOWER RISK	MEDIUM RISK	HIGH RISK
<p>Staying In the Home With Immediate Family Members EVERYONE IS HEALTHY</p> <p>Individual goes to the family home for a few hours, family provides transportation both ways</p> <p>Family gathering is immediate family only, already lives in family home and no one in the family is sick or recently an exposure risk, less than 10 people</p> <p>Masks used as much as possible, social distancing-scattered tables and chairs</p> <p>Handwashing encouraged frequently Visitor screening done on symptoms when returning to program</p>	<p>If an Overnight is Requested EVERYONE IS HEALTHY Follow everything in Lower Risk plus...</p> <p>If possible, we ask that the return is on a business day when we have sufficient resources for screening and to support any potential needs</p> <p>For overnight stays testing is welcome but not mandatory. Family coordinates a rapid test before the return to the program, if negative result health screening also done by phone with the family.</p> <p>The family plan for the visit is our low risk ideas, outside and no large groups</p> <p>If the individual becomes symptomatic or is exposed to someone positive the family will need to keep the individual at their home until they no longer require quarantine</p>	<p>Travel to hot spot and/or flight even if EVERYONE IS HEALTHY</p> <p>Follow everything in Lower Risk and Medium Risk plus...</p> <p>Follow the state travel advisory guidance up to and including testing. Health screening must be completed by AB staff, no symptoms before return back to the program.
